

TISDALE RESOURCES COMMENCES IP SURVEY AT KEEFE LAKE URANIUM PROJECT

September 28, 2021 – Vancouver, British Columbia – Tisdale Resources Corp. (the “Company”) (TSXV: TRC) announces that the field crew has been mobilized to the Company’s exploration camp. From there they will be transported by float plane to the Keefe Lake Uranium Project where they will carry out a detailed IP survey over the area of interest surrounding Holes 11-1A, 12-07, and 12-08. Lines will be carried out at 100m spacing between lines. Stations will be carried out at 50m intervals to allow for maximum depth investigation but at least 1 line will likely be done at 25m between stations to add resolution to the survey to allow for deeper penetration. Survey lines would be oriented N-S.

The Company will provide further updates on the survey work as they become available.

About the Keefe Lake Uranium Project

Keefe Lake is an advanced exploration project that covers an area of approximately 15,400 hectares, on the eastern side of the Athabasca Basin, in northeastern Saskatchewan, Canada. The project is on trend with the McArthur River, Cigar Lake and Key Lake Mines, three of the largest and richest uranium mines in the world.
